Sub:- Conduct of Practice-Teaching for the year 2018.

With reference to the above, we recall with grateful thanks for your positive gestures in encouraging the student-teachers of our college to carryout practice-teaching in your esteemed institution during II Semester.

I Phase of practice teaching for II Semester is successfully completed and now we are sending the III Semester Student-teachers for practice-teaching to your institution from 11-06-2018 to 07-07-2018.

During this period, each student-teacher is expected to give two lessons in each subject per week and totally 4 lessons in a week. Accordingly the time-table may kindly be prepared.

In this connection students will visit your school on 02-06-2018 & 09-06-2018 to collect units and time-table for practice-teaching. Hence subject teachers may kindly be informed to allot teaching units and time-table for the smooth conduct of practice-teaching.

I hope you will do the needful and oblige.

Thanking you,

Yours sincerely,

R. Rudraradhya

III SEMESTER

General Instructions to student-teachers for Practice-Teaching Programme
Remember the following points and act accordingly.

1. Practice teaching will be held from 11-06-2018 to 07-07-2018 for the year 2018.
2. Try to know the working hours & Bell Timings of the Institution and follow accordingly.
3. First, meet the Head of the Institution and Co-operating Teachers. Discuss with them. Afterwards collect the time table and also teaching units.
4. Maintain Attendance Register properly.
5. Enter the class with prescribed printed & Corrected lesson plan.
6. Trainees should get the signatures, of the method master or Co-operative teachers, (who observes their lessons) in their observation books and lesson plans. Otherwise these observations and lessons will not be considered as valid.
7. No trainee should remain absent, during Block practice teaching without prior permission of the principal. If any body wishes to apply leave, he or she, should apply leave in triplicate, (the principal, the head master of the practicing school and to the leader) two days well in advance. The lesson which is left out during your leave period should be made good with special arrangement with the help of leader & the Head master.
8. Use necessary teaching aids while teaching a lesson.
9. Trainees should use Rollup Black boards, teaching aids, charts, apparatus, maps, etc, to enrich their teaching. Use

Objectives

- To acquaint student-teachers with different cooperative learning strategies
- To appreciate the cooperative learning strategies of teaching
- To prepare them to adopt these strategies during their practice teaching and internship programme
- To popularise the cooperative learning strategies in teaching-learning process
- To tap the talent of leadership qualities among the students
- To develop interpersonal relationship among the students
- To develop a sense of accountability in the process of learning
- To bring variety in the classroom teaching.

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

A Report

Co-operative learning is the instructional use of small groups so that students work together to maximize their own and each other's learning.

Cooperative learning is an organized and structured way to use small groups to enhance student learning and interdependence.

Advantages:

1. Cooperative learning is fun, so students enjoy it and are more motivated.
2. Cooperative learning is interactive, so students are engaged, active participants in the learning.
3. Cooperative learning allows discussion and critical thinking, so students learn more and remember what they've learned for a longer period.
4. Cooperative learning requires students to learn to work together, which is an important skill for their futures.
5. It can improve attitudes of students of different races, ethnicities, and academic abilities towards one another.
6. Students may explain things better to another student than a teacher to a class. Students learn how to teach one another and explain material in their own words.
7. Cooperative learning has the potential to meet more learning style needs more of the time than individualized direct instruction.
8. It has been shown to have a positive effect on student learning when compared to individual or competitive conditions.
9. Higher ability students can be experts, leaders, models and teachers; lower ability students get the benefits of having higher ability students in their group.
10. Positive interdependency is achieved as individuals feel that they cannot succeed unless everyone in their group succeeds
11. Interpersonal and collaboration skills can be learned in a cooperative learning activity
12. Sends the symbolic message that the class is egalitarian and classless

The above input was given to the student-teachers in Educational Technology class, the video of components of Cooperative learning strategy, and different types of cooperative learning strategies, their advantages and their implementation in the classroom situation was shown by scheduling a Zoom meeting, which is given below.

PPT Used for Cooperative Learning Strategy

Co-operative Learning Strategies

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

Co-operative learning

Meaning

Co-operative learning is the instructional use of small groups so that students work together to maximize their own and each other's learning.

Co-operative learning is an organized and structured way to use small groups to enhance student learning and interdependence.

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

| Point of difference | Collaborative | Cooperative |
|---------------------------------------|---|--|
| Roots | Roots in U.K. | Roots in U.S.A. |
| Epistemological Base | Group work on theories derived from studies about the social nature of human knowledge. | Motivational, Social Cohesion and Cognitive Perspective (Cognitive development & Cognitive elaboration). |
| Nature | Informal | Formal |
| Nature of work | Common inquiry | Delegation of Tasks |
| Training in small group Social Skills | No Training, its assumed that they have these skills | Students receive training before working in groups |

| Difference | COLLABORATIVE | COOPERATIVE |
|---|---|--|
| Type of tasks | Tasks are open and in form of complex questions | Group task are normally close ended and planned |
| Level | Mainly used at higher level | Mainly used at foundation level |
| Responsibility for structuring activities | Students organise their efforts between themselves (group-structured) | Each student is assigned a specific role (teacher-structured) |
| Source of material | Students share source material to help them complete the activity | Teachers supply information for students to read and analyse (or let pupils know where this info can be found) |

PRINCIPAL
 Free Siedananga College of
 Education, B.H.Road, Tumkur

| Difference | COLLABORATIVE | COOPERATIVE |
|------------|---|--|
| Monitoring | The activity is not monitored by the teacher (although they can help when assistance is requested by the group) | Mainly teachers observe, listen and intervene where necessary in groups |
| Assessment | Students assess their own individual and group performance | Students submit work at the end of lesson for evaluation/assessment |
| Success | Success depends on individual strengths | The success of the group depends upon the efforts of everyone involved in a task |

Role of
a Teacher

- ▶ Helper,
- ▶ facilitator,
- ▶ consultant,
- ▶ manager

Engly

 Education, B.H.Road, Tumkur

Elements of Co-operative Learning

| | |
|-----------------------------|---|
| ➤ Positive interdependence | We can do it together |
| ➤ Individual accountability | We all have to do our parts |
| ➤ Interpersonal skills | How can we work together to accomplish the task in hand |
| ➤ Face to face interaction | I will help you and we will finish together |
| ➤ Group processing | What did we learn here |

Characteristics of Co-operative Learning

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

**Group should contain both
High and Low achievers
To have heterogeneity in the groups**

Ideally group contains
2-5 students
(depends on the strategies of learning)

Sink or Swim together

Positive interdependence

Shared Leadership

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

• Good performer or high achievers
Are also accommodated nicely
i.e., they get the chance to explain
the content to others Or can get
their doubt clarified

Promotes
good mental health of
Slow learners

Types of Co-operative Learning Strategies

| | |
|--------------|----------------------|
| Basic Jigsaw | Elliot Aronson, 1971 |
| Jigsaw II | Robert Slavin, 1986 |

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

Think-Pair Share

1. Think
2. Pair
3. Share

Round Robin

Round Robin has students brainstorm on a topic without elaborating, explaining, or questioning ideas.

- Group members take turns responding to a question with a word, phrase, or short statement.
- Students share their thoughts one at a time until all students have had the opportunity to speak.

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

RallyRobin

In pairs, students alternate generating brief oral responses.

Examples:

- List adjectives to describe the character.
- List inert elements.
- Share steps of the experiment.
- Describe an event from the story.

Timed Pair Share

In pairs, students share with a partner for a predetermined time while the partner listens. Then partners switch roles.

Examples:

- What is the key thing that you learned?
- What is one literary technique you plan to use in your writing and how will you use it?

RoundRobin

In teams, students take turns responding orally.

Examples:

- What makes a good listener?
- List objects that float?
- What clubs or societies are you a member of?
- What is one of your favorite movies?

RallyCoach

Partners take turns, one solving a problem while the other coaches. Then partners switch roles.

- Useful for any process or procedure with a definite right/wrong.
- Solve multi-step word problems in math.
- Change each decimal into a simplified fraction.

StandUp, HandUp, PairUp

Students stand up, put their hand up and quickly find a partner with whom to share or discuss.

This structure is perfect for classbuilding, processing and reviewing information, energizing the class, forming random pairs or teams, lesson starts or wraps.

The End

Report

A Team Teaching was conducted on the topic – 'Content Analysis and its Forms' by Dr. Jyothi.B.Panth, and Sri Kumar.K., Assistant Professors, SSCE on 31st Oct, 02nd Nov, 04th Nov 2022 in the TMAP Class.

Team teaching is defined as follows:-

- Two or more teachers working together to plan, conduct, and evaluate the integrated outcomes, curriculum, learning activities, and assessments for the same group of learners.
- Two or more instructors teaching the same students at the same time within the same classroom and sharing equal levels of responsibility.

The scope of the content was –

- Meaning of content analysis
- Advantages
- Different Forms of content

We, both planned the content as follows:

1. Following were the objectives set for the content to be taught

Students will be able to:

- a. Acquire the knowledge of content analysis
 - b. Understand the meaning of content analysis
 - c. Understand the different forms of content
 - d. Distinguish among the forms of content
 - e. Classify the forms of content
 - f. Give examples for the different forms of content
2. We thought of preparing PPT on the content to be taught, and executed accordingly., Dr. Jyothi.B. Panth, prepared the ppt and the content was discussed with Sri Kumar and corrections were made, then finalised
 3. We discussed the task of responsibilities as follows:
Dr.Jyothi.B.Panth was assigned to
 - a. Explain the meaning and advantages of content analysis
 - b. Explain the meaning of following forms of content: phenomenon, hypothesis, formula, laws, principles, theories.
 - c. Examples for the forms of content in science and mathematics

PRINCIPAL

Sree Siddaganga College of
Education, B.H.Road, Tumkur

Sri. Kumar was assigned to

- a. Give examples for the concretisation of content analysis by considering examples from the subjects Social Science and English.
 - b. Explain the meaning of following forms of content: terms, concepts, facts, events, Rule, generalisation, assumptions.
 - c. Examples for the forms of content in Social Science and English.
4. Flow chart was prepared

5. It was decided to evaluate the teaching by formative and summative evaluation(Google form)

Execution stage:

The team teaching was executed as per the plan. Dr. Jyothi.B.Panth introduced the students about team teaching and began the deliberation by welcoming one and all to the class. At first Dr. Jyothi.B.Panth initiated the class by asking the students to go through the text books of 8th/ 9th standard, state syllabus and asked them to come out with their observations in the units. Then the content analysis was introduced to them and was concretised by taking the examples from the textbook. After which the students were motivated to understand the advantages of doing content analysis for a teacher. This was followed by Sri Kumar's presentation on assigned topics, then again by Dr. Jyothi.B.Panth. During, the presentations Examples were given by both in different subjects for different forms of content systematically. The doubts of the students were clarified by both. The entire content was taught in two periods with the use of ppt and textbooks. While one was teaching, the other use to supervise the student's activities and understanding. Students were appreciated for their active participation by asking relevant questions and responding to the questions asked by the teachers.

3. Evaluation stage:

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

Students were assigned to study a unit and do content analysis, then to identify all possible forms of content in the unit selected.

At the end on 04th Nov 2022, a test for 12 marks(15 minutes) was conducted by the use of Google form with link <https://forms.gle/UFX95ugbDZwW2zUG>

This was administered with the help of mobile phone. All the students attended the test within the given time limit. Then the result was analysed and discussed. Four of the students didn't do well because of their absence to the team teaching class. They were taught the content once again on the same day during lunch hour.

II Semester – Nov 2022

Test- Content Analysis

"Any event that takes place in nature" is given by what form of content?

- Fact
- **Phenomenon**
- Term
- Generalization

It is a universally accepted truth- signifies

- The term
- Principle
- **Fact**
- Hypothesis

A statement/ question possessing independent and dependent variables.

- Theory
- Formula
- Law
- **Hypothesis**

Mathematical symbolization is done in which form of content?

- Theory
- Principle
- **Law**
- Assumption

A word possessing different meaning in different context- is coined as

- **A term**
- A concept
- An assumption
- A fact

Constantinople was captured by Turks in 1453- this statement is

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

- An hypothesis
- A theory
- **A fact**
- Assumption

'Democracy'- this is an example for both concept & term

- **True**
- False

Which among the following is not a concept?

- Communism
- Volcano
- Reproduction
- **Feeling**

$E=mc^2$ is the symbolic form of representing the relationship between the concepts- this is a feature of

- A Law
- A Principle
- A Hypothesis
- **A Theory**

Metals are the good conductors of heat and electricity- this is an example of

- A Law
- **A Generalization**
- A Theory
- A Principle

Jallianwala bagh massacre took place on April 13, 1919 at Jallianwala Bagh, Amritsar, Punjab where 379 people including men, women, and children (Indians) were killed while 1,200 were injured in the indiscriminate firing ordered by Colonel Reginald Dyer. – this is

- A Hypothesis
- **An Event**
- A Generalization
- A Fact

Meaning

Content analysis is the analysis of content of the subject to be taught into its [redacted] and [redacted] them in [redacted] in logical sequence.

It is a process of splitting and analysing and arranging all the content into sub-topics in the form of concepts, rules, generalization, law to have better impact on the learner.

Fact(ವಾಸ್ತವಾಂಶಗಳು):

Characteristics:

- It is a basic building block of knowledge
- Fact is sometimes used synonymously with truth
- Facts are central to building scientific theories
- It is verifiable and objectively real
- It is real and indisputable piece of information

2022

TMAP

9

9

Events(ಘಟನೆಗಳು) :

- It refers to the time, place and period.

Examples:

- Plassey war: It took place in the year 1757 between East India Company (Robert Clive) and Nawab of Bengal (Siraj -Ud- Daulah) at Plassey.
- Battle of Kalinga: it took place in the year 261 BC between the Maurya Empire under Ashoka and the state of Kalinga at Kalinga
- I war of Indian Independence
- I & II World War

2022

TMAP

10

10

PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

Assumptions(ಊಹೆಗಳು):

It is a thing that is accepted as true or as certain to happen without proof.

Example:

Alexander the great had the assumption that India is famous for its purity, and one can attain moksha by stepping in the land of India.

In an equilateral triangle ABC, an angle A= 60° , angle B= 60° , then angle C= 60°

2022

TMAP

11

11

Generalization(ಸಾಮಾನ್ಯೀಕರಣ):

- It is an inferential statement which expresses a relationship of two or more concepts. Generalisation is a process of framing principles, theories, and concepts by establishing relationship between facts. Generalisations can be drawn out from the facts through its systematic analysis and interpretation.

Examples:

- Monocots have fibrous root system
- Metals are good conductors of electricity.
- Electrons are negatively charged particles
- Pronoun is the word used instead of a noun like he, she, they.

2022

TMAP

12

12

PRINCIPAL
 Sree Siddaganga College of
 Education, B.H.Road, Tumkur

Formula(ಸೂತ್ರ):

- It is a concise way of expressing information symbolically as in mathematical or chemical formula. It is the general construct of relationship between given quantities.

• Examples:

- $F=ma$, newton's second law of motion. Where F = force, m = mass and a = acceleration.
- $E=mc^2$, "Energy equals mass times the speed of light squared."

2022

TMAP

13

13

Rule(ನಿಯಮ):

- It is a statement that tell's us what is allowed or what will happen within a particular system. Rule is a piece of advice about the best way to do something. It is a prescribed guide for conduct or action.

Examples:

- Fleming's left hand rule: Fleming's Left-Hand Rule states that if we arrange our thumb, forefinger and middle finger of the left hand perpendicular to each other, then the thumb points towards the direction of the magnetic force, the forefinger points towards the direction of the magnetic field and the middle finger points towards the direction of the current.
- Rules of war: not to attack the opponent when he is without arms/tools, no war after sun set....

2022

TMAP

14

14

PRINCIPAL
 Sree Siddaganga College of
 Education, B.H.Road, Tumkur

Phenomenon(ವಿದ್ಯಮಾನಗಳು):

- Any event that takes place in nature.

Examples:

- Photosynthesis, rainbow, glaciers, earthquake, volcano, rusting of iron, reflection, refraction, lighting, thundering, gravity, magnetism.

2022

TMAP

15

15

Hypotheses(ಪ್ರಾಕಲ್ಪನೆಗಳು):

- It is a tentative guess stated in the form of a statement or question towards the solution of a problem.
- It is an expected relationship between an independent and dependent variable.

Example:

There is no relationship between gender and academic achievement of 9th grade students of Tumkur District.

2022

TMAP

16

16

PRINCIPAL
 Sree Siddaganga College of
 Education, B.H.Road, Tumkur

Hypotheses(ಪ್ರಾಕಲ್ಪನೆಗಳು):

- **Characteristics:**
 - It is stated based on sound reasoning
 - Clear and understandable
 - Simple and brief
 - Testable and measurable (empirical statements)
 - Possess dependent and independent variables
 - It should agree with the observed facts
 - It does not conflict with any law of nature which is known to be true
 - It permits of the application of deductive reasoning

20XX

presentation title

17

17

Laws(ಕಾನೂನುಗಳು):

- A law is a generalized statement to explain a body of observation in the form of verbal or mathematical statement.
- The system of rules which a particular country or community recognizes as regulating the actions of its members and which it may enforce by the imposition of penalties.

Examples:

- "Shooting the birds is against the law"
- Newton's laws of motion:
 - Newton's third law of motion: for every action, there is equal and opposite reaction. $T=W$, where T = tension and W =weight

2022

TMAP

18

18

9
PRINCIPAL
Sree Siddaganga College of
Education, B.H.Road, Tumkur

Laws(ಕಾನೂನುಗಳು):

- Hook's law of elasticity:
 - States that stress developed is directly proportional to strain produced in the body.
 - Mathematically, $F = - kx$, Where F = Force, x = Change in position and k = Spring constant.
- Mendel's law of segregation:
 - When an organism makes gametes, each gamete receives just one gene copy, which is selected randomly. This is known as the **law of segregation**.

2022

TMAP

19

19

Theories (ಸಿದ್ಧಾಂತ):

- It is a well-substantiated explanation of some aspect of natural world that incorporates laws, hypotheses or facts. A theory is a set of facts, concepts, and principles which explains the underlying unobservable mechanisms, which affects the development of human knowledge.
- Theory is the analysis of a set of facts in their relation to one another in meaningful ways.

Example:

- Thorndikes trial and error learning theory.
- Pavlov's theory of classical conditioning (dog- salivation),
- Skinner's theory of learning (stimulus, response, reinforcement): it is based upon the idea that learning is a function of change in overt behaviour() reinforcers are important in the process of strengthening the learning.

2022

TMAP

20

20

10
PRINCIPAL
 Sree Siddaganga College of
 Education, B.H.Road, Tumkur

Theories (ಸಿದ್ಧಾಂತ):

- Darwin's theory of evolution: Theory of evolution by natural selection Darwin's theory of evolution by natural selection entailed three crucial elements: variation, reproduction, and heritability.
- Lamarck's theory of evolution: inheritance of acquired characteristics, use and disuse theory
- Valence bond theory
- Atomic theory
- Dwaitha, Adwaitha, and Vishistadwaitha (ದ್ವೈತ, ಅದ್ವೈತ, ಮತ್ತು ವಿಶಿಷ್ಟಾದ್ವೈತ)

2022

TMAP

21

21

Principle(ತತ್ವಗಳು):

- A principle states a relationship between classes of events, which enable us to predict the consequences, infer causes, control situations, or solve problems.
- It is a statement of relationship between two or more concepts.

Examples:

- Principles of Jainism, Buddhism, (Principles are the ideas suggested by the founders) Archimedes' Principle, Aufbau's Principle, Heisenberg Uncertainty Principle
- Heisenberg Uncertainty Principle: states that it is impossible to measure the exact position and exact momentum of a particle simultaneously. It states the relation between position and momentum.
